

## Daily Sidewalk Shed Inspection Log

### Maintenance Log Requirement

Sidewalk sheds must be inspected daily and the results recorded in a maintenance log, readily available on-site at all times. The log must include, at minimum, the following information:

|                                                                         |                                                                        |
|-------------------------------------------------------------------------|------------------------------------------------------------------------|
| <b>General Information</b>                                              | Permit #                                                               |
| Name of Shed Erector:                                                   | Installation Date :                                                    |
| Renters Name                                                            | Phone #                                                                |
| Shed type: Light____Med.____Heavy __ Duty                               | Drawings on site for inspection?                                       |
| <b>Specific Information</b>                                             | Sidewalk Shed Height                                                   |
| Number of platforms decked                                              | Are the base plates and mudsills secured?                              |
| Are the signs on the parapets?                                          | Are the shed pins and bolts installed?                                 |
| <b>Maintenance Information</b>                                          | Are the legs and poles plumb, braced and not displaced?                |
| Are cross braces fully attached, not bent, and not missing?             | Are tie-ins correctly spaced, properly secured and the correct amount? |
| Are pipe clamps tight?                                                  | Are the window jacks tight?                                            |
| Are the planks secured?                                                 | Are the decking and planks in good condition?                          |
| Is deck fully planked?                                                  | Are there gaps or open spaces on decking?                              |
| Are the guardrails and toe boards secured at all places where required? | Is the netting extension of full length and height?                    |
| Is the netting secured?                                                 | Is the parapet the proper height and secured?                          |
| Are the lights working?                                                 | Is the deck clean and free of debris?                                  |
| <u>Comments:</u>                                                        |                                                                        |
|                                                                         |                                                                        |
|                                                                         |                                                                        |
|                                                                         |                                                                        |
|                                                                         |                                                                        |
